

AppL LMS

 Legal Island

The compliance management
platform for workplace training

www.applilms.com

- + Reduce Risk
- + Reduce Cost
- + Improve Efficiencies
- + Extensive Course Portfolio

Brought to you by Legal Island

AppLI LMS is a one-stop shop for compliance training. The platform will provide your staff with training courses that have been specifically tailored to the Northern Ireland workplace.

In addition to providing your employees with 24/7 access to key compliance training courses, this platform will increase your employee engagement through the inclusion of your company policies, procedures and additional training resources that are relevant and specific to your organisation.

Reduce Risk

AppLI LMS will...

- + Ensure your company data is protected to the highest standard and fully ISO27001 compliant.
- + Provide jurisdiction-specific training in key areas, ensuring your staff understand their duties and responsibilities in compliance with the law.
- + Include a comprehensive reporting dashboard delivering an audit trail to strengthen your defence in any employment tribunal complaint, therefore protecting your company's reputation in the marketplace and in the eyes of your key stakeholders and customers.

Improve Efficiencies

AppLI LMS will...

- + Allow instant access to staff completion reports, stored in one place, through one provider – resulting in a reduction in the amount of time spent on your compliance record keeping.
- + Be accessible 24/7 – whether you have staff working in the office or remotely, the platform can be accessed from a mobile device, laptop, tablet, or desktop. This means that staff can tailor training completion around their work schedule.
- + Enable employees to self-enrol, removing the admin burden from HR and creating the opportunity to set deadlines and message all employees easily, from one platform.

Reduce Cost

AppLI LMS will...

- + Guarantee no set-up fees or hidden costs by offering access to unlimited users.
- + Enable you to train all staff in multiple locations, simultaneously, without the financial impact of travelling or coming together in groups, saving you money on your training budget.
- + Mitigate against profit-zapping fines by providing your organisation with the most robust level of protection in key compliance areas.

“The implementation of eLearning offered easily accessible training for all employees, without having to commute. The interface is extremely user-friendly, and the reporting features enable us to obtain measurable results with ease.”

Extensive Course Portfolio

AppLI LMS for you...

- + With an extensive portfolio of courses available, you can select and create a bespoke package of Northern Ireland-specific courses to be included on your very own platform.
- + The AppLI platform comes as standard with three or five courses included, you can select any from the list on the next page to best suit your training requirements. Alternatively, you have the option to make the entire suite of courses available to all employees in your organisation.
- + Whatever package to go for, you will also benefit from the assistance of our local support team and a dedicated account manager.
